

Siriporn Introduces **PUERARAGEL-F** /Vitamin C 10%, Vitamin A 2%, Niacinamide featuring Pueraraprem

Dear Customer

Thank you for purchasing our products and putting your confidence in us. We are working hard to bring unique and innovative products to the market place. We want our customers to look young and stay young. This product features **Pueraraprem, mixed hyaluronic acid, magnesium ascorbyl phosphate, retinyl phosphate and niacinamide.**

PueraraPrem™ “The highest quality pueraria mirifca in the world”

PueraraPrem™ is the organically grown brand of Pueraria Mirifica we use in our products. It is the very highest quality in the world. It is unique for the following reasons: Plants from the wild from all over Thailand have been studied for close to 20 years. Only the highest quality plants with the most unique genetic profiles were selected for cultivation. Proprietary nutrient enrichment protocols have been studied and are still ongoing and implemented. These cultivars have been moved to the most appropriate area of Thailand that supports the most ideal conditions for Pueraria Mirifica farming. These factors along with a 7 to 10 year harvest cycle produce the very highest actives. The very potent chromene molecules (deoxymiroestrol, miroestrol) and secondary actives in Pueraraprem™ are critically important for a unique level of estrogenicity. The profound estrogenicity affords a pathway to beautiful young looking skin.

Ultra Low molecular weight hyaluronic: This gel carrier is certainly much more than a carrier. This is an incredibly high tech material with proprietary modern technologies responsible for its inception. ULMW HA which is 5000-to 10,000 daltons. The substantially smaller molecule allows it to go deep into the dermis. It is very similar to Restylane® the cosmetic filler!

Sodium Hyaluronate is a substance that is naturally present in the human body. It is found in the highest concentrations in fluids in the eyes and joints. This is the long chain version and offers excellent barrier support.

MAP (magnesium ascorbyl phosphate): Magnesium Ascorbyl Phosphate (MAP) is a Vitamin C derivative that has better stability than ascorbic acid. In skin care MAP is often used for UV protection and repair, collagen production, skin lightening and brightening, and as an anti-inflammatory. It is also a potent antioxidant. This variation of the vitamin easily penetrates the skin.

Retinyl Palmitate: Is a potent form of Vitamin A. that covert to retinol in the skin. This formula contains 952,000 iu / 28 grams. The skin may tingle when applied. Vitamin A will speed up exfoliation which is very important in mature skin. Vitamin A stimulates collagen and elastin synthesis. Vitamin A also supports a thicker cell membranes.

Niacinamide: . Has the ability to visibly improve the appearance of enlarged pores, uneven skin tone, fine lines, dullness, and a weakened skin surface. It also modulates oils in the skin.

“Stronger thicker skin equals beautiful younger skin”
